

EZ510 – EZ Communicator USB Security Box

EZ510 USB Security Box is a small and light weight programming tool with dual USB ports. It may be used with any EZ Communicator product to easily update product software, audio sounds, or configuration. The EZ USB Security Box has a “Knockdown” function for emergency situations when audio and configuration files may not be available. With a properly formatted USB Flash Drive, the audio sounds and configuration of an EZ Communicator Push Button Station (EPBS) may be copied to the USB Flash Drive and then downloaded to a second EPBS.
